

The London M-learning Group brings together an international, interdisciplinary group of researchers from the fields of cultural studies, sociology, semiotics, pedagogy and educational technology from the Institute of Education, London, the University of Kassel, the London Metropolitan University and the University of Verona.

The group is working on a theoretical and conceptual framework for mobile learning around the notion of a cultural ecology. The analytical engagement with mobile learning of the group takes the shape of a conceptual model in which educational uses of mobile technologies are viewed in ecological terms as part of a cultural and pedagogical context in transformation.

The members collaborate on various projects and publications with each other, and organise joint events.
